

EUROPEAN NETWORK
ON RESEARCH PROGRAMME
APPLIED TO THE PROTECTION
OF TANGIBLE CULTURAL HERITAGE

Project funded by the European Commission under the Seventh Framework Programme
Grant Agreement n°219301 NET-HERITAGE

**Work Package 5 Implementation of joint activities through the coordination of
Advanced Training in the field of Tangible Cultural Heritage** was aimed to:

- ❖ Improve possibilities for the advanced training of professionals working both in the public sector and in the companies active in the heritage market.
- ❖ Develop a coherent and high-profile Advanced Training Programme in science-based conservation in Europe.
- ❖ Promote partnerships and mutual learning between EU member states.
- ❖ Promote and encourage the dissemination of research results from the research community as widely as possible among professional practitioners, especially SMEs.
- ❖ Build an effective critical mass in research and training across member states, achieving a multiplier effect as compared to the relatively small-scale efforts of individual institutions and single-state initiatives.
- ❖ Improve the competitiveness and promote EU leadership in the global heritage sector, enhancing job creation.

The Workshop will focus on dissemination and sharing of the Work Package 5 outcomes. The methodological approach on conservation and restoration of cultural heritage emerged during the WP5 activities has been summarized in Recommendations. forming the Framework for Advanced Education in the field of conservation-restoration and science for conservation. These Recommendations are essential to encourage opportunities to carry out advanced study and research in a broadest possible range of disciplines of the heritage field and thereby to meet better the many challenges to the long-term preservation of European Cultural Heritage.
